

PROJECT BRIEF

Professional AC Core Cutting Business Website

A production-ready, mobile-first website for a local AC core cutting, RCC drilling and wall drilling service business.

Project Type	Local Service Business Website
Primary Goal	Generate calls, WhatsApp enquiries and quote requests
Primary Audience	Homeowners, tenants, AC installers, contractors and businesses
Design Direction	Modern • Premium • Industrial • Trustworthy
Primary CTA	Get a Quote / WhatsApp / Call Now

1. Project Overview

The project is a professional website for a core cutting business that provides clean and accurate wall openings for AC copper pipes, drain/water pipes, electrical cables and related installations. The website should present the business as reliable, experienced and professional while making it extremely easy for customers to contact the business.

2. Business Objectives

Objective	Expected Outcome
Build trust	Professional branding, real project photos, reviews and clear service information.
Generate leads	Prominent Call, WhatsApp and quote-request CTAs.
Improve local visibility	SEO-friendly service and service-area content.
Show quality of work	Gallery with completed jobs and before/after examples.
Mobile conversions	Fast, responsive interface designed around phone users.

3. Final Website Structure

4. Page & Feature Requirements

Home

- Hero headline focused on AC core cutting and wall drilling.
- Primary actions: Get a Quote, WhatsApp Us and Call Now.
- Services overview with links to detailed service pages.
- Why Choose Us section covering accuracy, cleanliness, equipment and experience.
- Simple How It Works process: Contact → Discuss requirement → Site/job details → Core cutting → Completion.
- Recent work/gallery preview.
- Customer reviews/testimonials.
- FAQ preview.
- Strong final contact CTA.

Services

- Dedicated service pages/sections for AC Core Cutting, RCC Core Cutting, AC Drain Hole and Other Services.
- Explain use case, process, benefits and typical customer requirement.
- Include service-specific photos where available.
- CTA on every service page.

About Us

- Business story and experience.
- Professional equipment and working approach.
- Trust-focused content without making unverifiable claims.
- Real team/work images where available.

Gallery

- Real photos of completed work.
- Before/after presentation where available.
- Categories for easier browsing.
- Optimized images for fast loading.

Reviews

- Customer testimonials.
- Google review integration/link when available.
- Clear distinction between verified platform reviews and manually entered testimonials.

FAQ

- Common AC core cutting and wall drilling questions.
- Answers written in simple customer-friendly language.

- FAQ structured data where appropriate.

Service Areas

- Main city and nearby areas.
- Individual local landing pages only where useful and genuinely served.
- Map/location support.

Contact

- Phone and WhatsApp.
- Quote/request form.
- Business location/service area.
- Google Maps.
- Business hours, if provided.

5. Recommended Production Tech Stack

Layer	Recommendation
Framework	Next.js + TypeScript
Styling	Tailwind CSS
UI	Reusable responsive components
Forms	Server-side/API-backed form handling with validation
Images	Optimized responsive images with lazy loading
SEO	Metadata, sitemap, robots, canonical URLs and structured data
Analytics	Privacy-conscious analytics and conversion tracking
Deployment	Production deployment with HTTPS and custom domain

6. Design System

- **Visual style:** Premium local-service brand with an industrial/technical feel.
- **Typography:** Modern, highly readable sans-serif typeface with strong headings.
- **Photography:** Prefer real photos from the father's work over generic stock imagery.
- **Color system:** Neutral professional base with one strong brand accent selected after business branding is confirmed.
- **Interactions:** Subtle transitions and micro-animations; performance and usability take priority.
- **Mobile:** Phone-first layout with sticky contact actions and large tap targets.

7. SEO & Local Business Strategy

- Target relevant local search intent such as AC core cutting, AC pipe hole drilling, RCC core cutting and wall drilling in the actual service area.
- Create unique, useful content for each major service.
- Use descriptive page titles and meta descriptions.

- Add LocalBusiness/service structured data with only accurate business information.
- Generate XML sitemap and robots.txt.
- Optimize Core Web Vitals through compressed images, efficient code and limited unnecessary JavaScript.
- Use real customer reviews only with appropriate attribution/permission.

8. Conversion & Trust Features

Feature	Purpose
Sticky WhatsApp button	Fast enquiry from mobile visitors.
Call Now CTA	Immediate contact for customers who need service quickly.
Request a Quote	Capture customers who prefer written enquiries.
Real work gallery	Demonstrate workmanship and build confidence.
Reviews	Provide social proof.
Service area	Set clear expectations about where the business operates.
FAQ	Reduce customer hesitation and repetitive questions.

9. Content & Assets Needed

- Final business name and logo.
- Business phone number and WhatsApp number.
- City, service area and business address if applicable.
- List of actual services offered.
- Years of experience and business background.
- Real work photos: machines, drilling process, completed holes and before/after examples.
- Customer reviews/testimonials, with permission to publish.
- Business hours.
- Google Business Profile/review link, if available.

10. Definition of Done

- All agreed pages are responsive and visually consistent.
- Navigation works correctly on desktop and mobile.
- Call, WhatsApp and quote actions are functional.
- Forms validate input and handle errors safely.
- Images are optimized and pages load quickly.
- SEO metadata, sitemap and robots configuration are implemented.
- Accessibility basics are addressed: keyboard navigation, labels, contrast and alt text.
- No placeholder business information remains before launch.
- Site is tested on current major desktop and mobile browsers.
- Production deployment uses HTTPS and the final custom domain.

11. Future Enhancements

- Online appointment/request scheduling.
- Automated WhatsApp enquiry workflow.

- Admin dashboard for leads.
- Service-specific pricing/quote calculator if the business has standardized pricing.
- Google review request workflow.
- Multi-language support such as English + Gujarati/Hindi.
- Blog/knowledge section for long-term SEO.

Project status: Website architecture and project direction finalized. Business-specific content, branding, photos and contact details will be inserted during implementation.
